

**ALTEA GREEN POWER: AUTHORIZATION GRANTED BY THE PUGLIA REGION
FOR A 96.8 MW PHOTOVOLTAIC PROJECT
IN THE MUNICIPALITY OF NARDÒ (LE)**

**COMPLETION OF THE AUTHORIZATION PROCESS SIGNIFICANTLY
STRENGTHENS THE PORTFOLIO OF AUTHORIZED PROJECTS**

Rivoli (Turin), 1 October 2026 - **Altea Green Power (AGP.MI, hereinafter “AGP” or “the Company”)**, a company active in the development of projects and the construction of “green energy” plants, announces that the Puglia Region has authorized a ground-mounted photovoltaic project with a total capacity of approximately 96.8 MW in the Municipality of Nardò (LE).

The authorization was granted by the Puglia Region upon completion of the process, which included an Environmental Impact Assessment (VIA) procedure before the Ministry of Environment and Energy Security (MASE), followed by the Sole Authorization (AU) procedure before the Puglia Region.

The project, developed through a special-purpose vehicle and with an authorized capacity close to 100 MW, is the largest renewable energy generation initiative that Altea Green Power has managed and successfully brought to completion to date.

This authorization adds to those already obtained by Altea Green Power, further increasing the total capacity authorized as part of its renewable energy development activities and confirming the Company's ability to successfully complete authorization processes for large-scale projects.

Additionally, for Altea Green Power, the authorization of this plant, which is already under contract with a leading industry player, marks the achievement of the final milestone under the contractual agreements, with approximately € 1 million expected to be received by the end of first quarter 2027.

In the words of Giovanni Di Pascale, CEO of Altea Green Power: *“The authorization of the Nardò project, with a capacity of 96.8 MWp, is an important achievement for Altea Green Power and further confirms our ability to develop large-scale renewable energy plants while managing regional and local authorization processes that are widely recognized as among the most complex and demanding. Achieving this milestone underscores the know-how developed by the Group and further strengthens the quality and depth of our project portfolio”.*

This press release is available on the Company website www.alteagreenpower.it and at www.1info.it

About Altea Green Power

Altea Green Power is a company listed on the Italian Stock Exchange - STAR segment -, founded in 2008 in Rivoli with the aim of supplying and managing renewable energy plants - photovoltaic, wind, and storage - that ensure maximum efficiency and operational reliability, all

while fully respecting the environment. Altea Green Power is also an Independent Power Producer (IPP) focused exclusively on renewable sources and a supplier of EPC (Engineering, Procurement, and Construction) services, positioning itself as the primary point of reference for the construction and start-up of renewable plants. In a market where energy transition is central and medium to large-sized companies are increasingly taking the lead, Altea Green Power aims to be a key partner in the field of energy efficiency, helping its clients identify the best solutions to reduce energy consumption and mitigate the resulting impacts on global climate change.
